CDC/PIHOA one-on-one USAPI weekly check-ins

Week: 4/27-5/1/2020

Regional Summary:

- Testing capability is improving but still limited
 - All USAPI now have testing capacity on-island
 - Small numbers of tests available on-island
 - There is a need for additional lab supplies (especially swabs and VTM)
 - Questions about using donated antibody tests
 - Pressure for community testing in some USAPI
- Concerns with medical surge and case management
 - Questions about what medical supplies (including drugs) and quantities should be procured
 - Challenges with procurement (relatively small orders, global shortages, slow procurement processes locally)
 - Request for clinical training on COVID-19 patient management and ventilation (specific to USAPI)
 - Need for inventory systems and inventory management training
 - Request for facility assessment and guidance for improvement
 - Request for guidance on management of human remains (on and off-island deaths)
 - Request for more support on contact tracing (training, materials, staff)
- Technological challenges
 - Limited use of telehealth on-island
 - Concerns with IT infrastructure for on/off-island telemedicine
- Transportation challenges
 - Many USAPI have stranded residents who want to return home
 - Request for TA on quarantine protocols for travelers
- Challenges with PPE
 - Need for inventory systems and calculating burn rates
 - Request for guidance or protocols for PPE preservation and reuse and PPE use training
- Questions regarding community mitigation strategies
 - Request for TA on appropriate levels of social distancing
 - Request for TA on risk communication
