<td>AS</td>
<td>0 cases; 0 PUIs</td>
<td>Abbott ID NOW (2,132 available) and GeneXpert (2,198 available) testing on-island; LBJ is retrofitting their lab for ABI 7500 (running by 6/30); ASDOH is also procuring ABI 7500 and expanding lab; 626 total samples have been tested (patients, travelers, first responders)- all negative</td>
<td>All flights suspended in/out of AS (extended to 6/30); no ship passengers/crew may disembark; some individuals have been allowed into AS via military flights w/ testing and quarantine requirements; repatriation from Samoa began last week (64 pax in quarantine)</td>
<td>Some social distancing measures are still in place, but original measures have recently been relaxed</td>
<td>39 ventilators functional at LBJ (1 in use); 150 beds (65 in use), 16 ICU beds (1 negative air flow in isolation); tent set up outside of LBJ to screen patients; quarantine sites ready for 240 people; swing ward (8 beds) established at LBJ for COVID-19 patients while isolation site is being completed at LBJ (negative pressure tent set up but need to finish inside) with 8 beds</td>
<td>Stocks unknown at this time</td>
<td>Request for telemedicine options, preferably real-time</td>
</tr>
<tr>
<td>CNMI</td>
<td>30 positive cases with 2 deaths and 27 recovered; no new cases reported this week</td>
<td>Abbott ID NOW (3,532 available) and GeneXpert (2,784 available) testing on-island; 10,765 total specimens collected; ABI 7500 installed and waiting on training; BioFire is on-island but there are no tests; community surveillance being conducted using Solgent Diaplex</td>
<td>Non-resident passengers w/ negative test w/in 72 hrs of arrival may enter (if no test results, 5-day facility quarantine w/ test on day 5 at their expense); residents can home quarantine and test on day 5; 3 currently in quarantine; Sara Alert used for follow-up</td>
<td>Social distancing efforts are slowly being relaxed and non-essential businesses are opening with social distancing measures in place</td>
<td>46 usable ventilators (42 available); at CHCC- 75 hospital beds (44 occupied), 8 ICU beds (2 occupied), 10 isolation rooms with negative air flow; Kanoa hotel is set up as an alternative care site with ICU, medical ward, and step-down units (to be opened soon); medical tent is outside of the hospital with 40 beds (ready for use); quarantine sites at Kanoa &amp; PIC (332 rooms)</td>
<td>N-95s: 68,073</td>
<td>Will need ongoing pipeline of tests for travelers and ongoing contact tracing and community surveillance</td>

Abbott ID NOW (3,532 available) and GeneXpert (2,784 available) testing on-island; 10,765 total specimens collected; ABI 7500 installed and waiting on training; BioFire is on-island but there are no tests; community surveillance being conducted using Solgent Diaplex
### Guam
- **Cases:** 248 positive cases; 5 deaths; 179 recovered; large increase from last week due to military cluster
- **Tests:** Now running ABI 7500 (5,107 available), Abbott ID NOW (2,227 available), and GeneXpert (1,465 available); 10,415 total tests have been conducted
- **Quarantine rules:** Quarantine rules for incoming passengers have been relaxed and are dependent upon resident status and country traveling from
- **Facility:** Guam has moved to PCOR-2 which allows some non-essential businesses to open back up with social distancing; currently reevaluating reopening plan due to case surge
- **Isolation:** No hospitalized cases; isolation facility has been established at a hotel (1 currently in facility isolation, 6 in home isolation, 37 in military isolation); 271 in facility quarantine; extensive contact tracing and follow-up being done (2,933 contacts identified)

### Chuuk
- **Cases:** 0 cases; 0 PUIs
- **Tests:** Abbott ID NOW (1,719 available) and GeneXpert (1,016 available) testing on-island; 2 total tests conducted on-island using Abbott (both negative)
- **Borders:** Borders closed until at least 7/31; no ship passengers/crew may disembark; cargo is still arriving via planes and ships; FSM National is working on plans for repatriation
- **Education:** Education is being conducted in communities; social distancing is being encouraged
- **Facility:** 21 working ventilators; 104 beds in shared wards, 9 ICU beds, 14 beds in isolation rooms, no negative air flow; ARFF compound at airport for isolation (4 rooms/beds); quarantine for 27 people at High Tide Hotel; Chuuk Gym (70 beds) and Chuuk High School (120 beds) set up as alternative care sites but lacking items

### Kosrae
- **Cases:** 0 cases; 0 PUIs
- **Tests:** Abbott ID NOW (671 available) and GeneXpert (652 available) testing on-island; 0 tests conducted on-island
- **Borders:** Borders closed until at least 7/31; no ship passengers/crew may disembark; cargo is still arriving via planes and ships; FSM National is working on plans for repatriation
- **Community:** Community-level education; events are discouraged but still happening (so limited social distancing measures in place); social distancing draft guidelines under review
- **Facility:** 3 FEMA vents on-island but need tubing; 45 hospital beds (2 ICU in 1 room), 5 isolation rooms, no negative air flow; a quarantine facility (24 rooms) is to be built in 2-3 months; Kosrae high school being renovated for temporary quarantine; surge capacity site to be determined and renovated; plans to expand isolation ward

CDC/PIHOA one-on-one USAPI weekly check-ins
Week: 6/22-6/26/2020

Regional Summary:

• Testing capacity continues to improve
  o All USAPI have at least Abbott ID NOW and GeneXpert running
  o PCR is available in Guam and Palau; installation underway in CNMI, American Samoa, and Majuro
  o Adequate test stocks for now, but no confirmed long-term pipeline for tests, although more shipments expected through July

• Many USAPI are not prepared for case management and contact investigation
  o TA is ongoing from multiple partners to develop systems
  o TA is ongoing from multiple partners to conduct tabletop exercises to test systems

• Clinical management training now being offered but there are still gaps
  o Clinical training (CME) over Zoom (patient management, ventilation, etc.) began last week
  o Request for 24/7 hotline for clinical questions
  o Request for simple guidelines on patient management

• Many USAPI are struggling with repatriation of residents
  o Need to test these protocols and make certain that adequate facilities and other resources are in place prior to repatriation, and that quarantine is conducted properly

• PPE stocks have been established but challenges remain
  o No long-term pipeline established and many USAPI still have inadequate stocks
  o Need for inventory systems to calculate burn rates and monitor consumption
  o Request for guidance or protocols for PPE preservation and reuse

• Many USAPI do not have long-term COVID-19 Preparedness and Response plans
  o Tough decisions need to be made regarding opening of borders and levels of social distancing
  o Challenges balancing COVID-19 response and delivery of other health programs
