 - Guam is allowing vaccinated travelers or unvaccinated travelers with negative test 72 hours prior to arrival to enter without testing or quarantine. All others are subject to a 10-day quarantine at a government facility.
 - CNMI is allowing travelers with facility quarantine requirement (5-day test out option).
 - Palau is running regular Guam flights with quarantine exemptions for vaccinated travelers (but with restricted movement) and testing on days 1&5.
 - RMI has regular repat flights ongoing with HNL/in-country quarantine and testing requirements.
 - AS is running HNL flights using "Talofa Pass" system with pre-travel testing and AS quarantine (no longer HNL quarantine).
 - FSM continues smaller repat flights with Guam/FSM quarantine and testing requirements.
- COVID-19 Laboratory Testing capacity
 - Supplies of Abbott ID NOW, Abbott Binax, and GeneXpert are low in some USAPI as travel testing demands increase; difficulties with procurement.
- Community mitigation strategies
 - Guam is in PCOR-3 but is now requiring vaccination to enter indoor locations; schools also remain closed due to delta surge.
 - CNMI, American Samoa, FSM, Palau, and RMI have relaxed most mitigation measures.

USAPI Vaccine Summary Tables and Charts:

**Note that all data except for those detailing Outer Island coverage rates comes directly from Tiberius. Thank you to Katrina Myers and the entire USAPI Tiberius Team for helping assemble "Dr. B's Famous Slide-set." Thank you to the jurisdictions who enter this data into WebIZ each day to keep it up to date.*

**Outer Island data was provided by each jurisdiction based on their outer island outreach activities. Because of this, there may be discrepancies between the two data sets (Tiberius and the Jurisdiction Outer Island Data). Also, some jurisdictions have yet to report their data in detail. Thank you to Dr. Haley Cash for assembling the Outer Island table and each of the jurisdictions for collecting and reporting this unique, yet important data.*
