Regional Summary:

- **COVID-19 cases**
  - Guam has reported 18,863 total cases and 258 deaths with 258 new cases (↓ from 435 last week) and 10 new deaths reported this week (-- from 10 new deaths last week); test positivity 6.0% (↓ from 8.0% last week)
  - CNMI has reported 381 total cases and 3 deaths; 42 new cases (5 imported and 37 community, ↑ from 37 last week) and 0 new deaths reported this week; cases continue to be identified from community-based testing and contact tracing with transmission primarily in households and most cases linked to known clusters; one case hospitalized for precautionary observation; schools to reopen 11/29
  - Palau has reported 8 total cases (6 travelers in restricted movement, 2 contacts) with 0 new cases this week; no community transmission
  - American Samoa has reported 5 total cases (all imported) with 1 new case reported this week (fully vaccinated traveler in border quarantine)
  - FSM and RMI have had no community transmission

- **COVID-19 Vaccine distribution summary** (See USAPI Vaccine Summary with 25 updated tables and figures listed below)
  - Pediatric formulation of the Pfizer vaccine ordered and delivered to each of the 6 USAPI, many campaigns started this week (pediatric rollout began 11/9 in Guam and 11/6 in CNMI; to begin on 11/15 in American Samoa)
  - Based on jurisdictional reports: a total of 262,000 people in the region are fully vaccinated (79.0% of all eligible individuals / -1% / denominators now include newly eligible 5-11 age group in CNMI and Guam hence the decrease)
    - An additional 17,946 people in the region are partially vaccinated (5.5% of eligible individuals in the region)
    - Note: eligible individuals are 5+ for CNMI, Guam — 12+ for AS, Palau, Kosrae, Yap and RMI — 18+ for Chuuk and Pohnpei
  - Based on data submitted into Tiberius via Webiz: **88% of all people aged 12 years and older have had at least one dose of a COVID-19 vaccine; 79% are fully vaccinated.** This percentage includes Pohnpei and Chuuk (FSM) who have yet to start vaccinating adolescents.
  - Current percentages of eligible population **aged 12 and over** fully vaccinated (with change from last week’s data in parenthesis):
    - **American Samoa: 84% (--)**
    - FSM: Chuuk: 49% (--), Kosrae: 70% (+1%), Pohnpei: 58% (--), Yap: 68% (--) 
    - Guam: 90% (--)
    - RMI: 60% (+2%)
    - CNMI: 85% (+1%)
    - Palau: >99% (---)
  - Outer Island vaccinations: Outer Island coverage rates from jurisdictional outer island outreach activities due to difficulty in determining denominators and true residence in Tiberius.
    - **RMI Outer Islands:** At least one dose 52% (+1%); Fully 40% (+1%) (denominators adjusted based on OI reports and expanded to 12+)
    - **Yap Outer Islands:** At least one dose 98% (---); Fully 95% (---) (denominators adjusted to locally collected denominators for 18+)
    - **Chuuk Outer Islands (out of the lagoon):** Fully 31% (---) (OI numbers are incomplete)
    - **Pohnpei Outer Islands:** Fully 63% (---) (denominator adjusted based on OI reports for 18+)
  - Boosters: 23,757 total boosters/additional doses have been provided in the USAPI: AS: 776; FSM: 656; Guam: 14,640; RMI: 373; CNMI: 5,227; Palau: 2,085

- **COVID-19 Containment strategies**
  - Guam is allowing vaccinated travelers or unvaccinated travelers with negative test 72 hours prior to arrival to enter without testing or quarantine.
  - CNMI is allowing travelers with facility quarantine requirement (5-day test out option if vaccinated; 10-day if unvaccinated).
  - Palau is running regular Guam flights with quarantine exemptions for vaccinated travelers (but with restricted movement) and testing on days 18&5.
  - RMI has regular repeat flights ongoing with HNL/in-country quarantine and testing requirements.
  - AS is running HNL flights using “Talofa Pass” system with pre-travel testing and 10-day AS quarantine (no longer HNL quarantine).
  - FSM continues smaller repeat flights with Guam/FSM quarantine and testing requirements.

- **COVID-19 Laboratory Testing capacity**
  - Supplies of Abbott ID NOW, Abbott Binax, and GeneXpert are low in some USAPI as travel testing demands increase; difficulties with procurement.

USAPI Vaccine Summary Tables and Charts:

*Note that all data except for those detailing Outer Island coverage rates comes directly from Tiberius. Thank you to Katrina Myers and the entire USAPI Tiberius Team for helping assemble “Dr. B’s Famous Slide-set.” Thank you to the jurisdictions who enter this data into WebIZ each day to keep it up to date. *Outer Island data was provided by each jurisdiction based on their outer island outreach activities. Because of this, there may be discrepancies between the two data sets (Tiberius and the Jurisdiction Outer Island Data). Also, some jurisdictions have yet to report their data in detail. Thank you to Dr. Haley Cash for assembling the Outer Island table and each of the jurisdictions for collecting and reporting this unique, yet important data.
